READ BEFORE ORDERING

Be sure to give your Zip Code Number

To be sure of getting your plants while you are here we should have your order in advance of your coming so we can have them ready for you, as we may not be able to dig the stock while you are here.

Business Information

NOT OPEN ON SUNDAYS AND SATURDAYS.

THESE PRICES are in effect Fall 1967, Spring 1968.

All previous prices cancelled.

ALL OUR STOCK is fresh dug for each order. None of it is in storage.

PRICES named in this Trade List apply only to orders placed by nurserymen, florists, and dealers. Maryland customers are subject to 3% sales tax or send your License Number. All delivery costs are to be paid by purchaser.

PACKING. Boxes and bales will be charged costs of material and labor used. We will add this cost to your invoice. This cost applies whether you remit with order or buy on time terms.

CLAIMS, if any, must be made immediately upon receipt of goods, and if just, made satisfactory, but in no case are we responsible for more than the purchase price of the stock in question. We will not be responsible for failure to fill orders in full or for any damage or delay to stock after delivery to the transportation company. Claims not made within ten days cannot be honored.

TERMS. Net, no discount or net 30 days from date of shipment to those of known responsibility but must have satisfactory business references from others or remittance must accompany order. Those desiring stock shipped C.O.D. will please remit one-fourth the amount of their purchase when ordering. Other terms by special arrangement. 1% per month interest will be charged if not paid when due.

NON-WARRANTY. We give no warranty, expressed or implied, the purchaser assuming all risk and responsibility of transportation, growth, planting, life of stock or any other matter on any stock we sell. We send out good stock, carefully grown and packed but cannot control conditions after it leaves our care. We exercise the greatest care to keep our stock true to name and are willing to replace on proper proof any stock that may prove otherwise, or refund the amount paid us for such stock, but it is mutually agreed that we shall not at any time be liable for any greater amount.

TELL US HOW TO SHIP, whether by express or parcel post. It is mutually agreed that whether you name the route or leave it to our own selection, we will not in any way be responsible for time or condition of delivery and our responsibility ceases upon our delivery to the transportation company. We cannot ship by railway freight.

HARDINESS OF PLANTS. When hardiness of plants is mentioned herein it applies to this section.

TIME OF SHIPMENT. We ship most every week in the year with the possible exception of during the winter when bad weather makes it impossible. Of course, there is a regular season for shipping the different plants, but if you want them out of season and are willing to take the risk of good delivery, we will pack with the utmost care and get them off to you at most any time you want them. Risky shipping in hot summer.

PLAN TO VISIT OUR NURSERY

We will certainly be glad to have you come to see our stock for yourself. We believe you will find it compares favorably with that grown by other nurseries. We are on the Eastern Shore of Maryland, 100 miles south of Wilmington, Delaware, 100 miles from Chesapeake Bay bridge and tunnel via Norfolk, Va., 90 miles from Annapolis, Md., via Chesapeake Bay Bridge, 150 miles from Baltimore, Md., via Elkton, Md., 225 miles from New York, N.Y. We are on U.S. Route 50, 10 miles east of Salisbury, Maryland, on the Delmarva Eastern Shore.

AZALEAS

Sizes of azaleas are as follows: 2 in. pot plants are a rooted cutting grown in the pot one season, 2 yr. size grown one year in pot and one year in field beds, 3 yr. size have been grown in pot one year and field beds two years and 4 yr. size grown in pot one year and field bed three years.

KURUME AZALEAS

The Kurume Azaleas are one of the most showy of all flowers for the garden. They are also well adapted to forcing—thousands of them being sold for Easter, Mother's Day, and Decoration Day. They are comparatively easy to grow and make such a wonderful display that the demand is constantly increasing. Many of the varieties are hardy out-of-doors as far north as Long Island. They are extremely floriferous, and in season, the blossoms completely cover the plants. The colors are almost every hue and shade except yellow, as you will find below.

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate.

If a variety is listed at 10 rate and not each rate there will be an additional charge of 15 cents per plant if less than 5 are ordered.

Items marked by an asterisk (*) are classed as Lining-Out stock.

GABLE'S HARDIER AZALEAS

Mr. Joseph B. Gable of Pennsylvania has spent almost a lifetime working with Azaleas and Rhododendrons. Many years ago he started breeding azaleas with the hopes of producing a hardier type of evergreen azalea in a good color range than then available. He has had wonderful success and is now recognized as the leader in this field.

As to hardiness: these varieties will average hardier than Hinodegiri and Amoena and much hardier than the other Kurumes. All have lived and flowered in the open field where they have withstood temperatures of twenty below zero and more in the past few winters with only negligible injury to a few. Most of them were uninjured.

U.S.D.A. AZALEAS

Some years ago the U.S. Dept. of Agriculture introduced a collection of Azaleas mostly from Japan. We have been growing these Azaleas many years and have selected the following varieties as the best ones in this collection. They are well worth trying.

BENI KIRISHIMA. Old rose, semi-double.

NEW U.S.D.A. AZALEAS

The Crops Research Division of the Agricultural Research Service, U. S. Department of Agriculture, hereby releases five azaleas. These varieties were developed by B. Y. Morrison and J. L. Creech at the U. S. Plant Introduction Station, Glenn Dale, Maryland, from a series of crosses made in 1947 and designed to incorporate some of the flower qualities of the Belgian-type azaleas into the hardy Glenn Dale hybrids.

After widespread trials of 96 selections, the azaleas being released at this time are considered to be the most promising for the azalea-growing areas of southeastern United States, from Washington, D. C., to Louisiana, and for forcing in all areas.

Their significant characteristic is in the pastel coloring of the flowers and the heavy texture of the petals. Occasionally the white selections are flecked and striped with red or purple, and some flowers show an irregular degree of doubleness. They flower in the Washington, D. C., area about May 8 to 15. These are suggested for further trial.

BAYOU (PI 279405). A spreading azalea with leaves narrow elliptic, slightly hairy, dark green. Flowers 2½" across, single but with occasional petaloid stamens, white with occasional scarlet flakes and stripes.

3 in. pot plants 2 yr. \$1.25 \$10.00
 4 in. pot plants 2 yr. 1.50 12.50

GREEN MIST (PI 279406). A somewhat upright azalea with leaves glossy, narrow elliptic, glabrous. Flowers 2½" across, single, white with a distinct greenish blotch, heavy texture to the flowers. We have found this the hardier of this set.

PINK ICE (PI 279408). A broad spreading azalea, with leaves dull green, large rather obovate, glabrous. Flowers 3" across, double, mallow purple with occasional purple flakes, smooth margins and crisp texture.

3 in. pot plants 2 yr. trans \$7.50

WHITEHOUSE (PI 279409). A broad spreading azalea with leaves large, dull green, somewhat obovate, slightly hairy. Flowers 3¾" across, single, white with roundish petals with somewhat wavy margins and overlapping.

DEERFIELD AZALEAS

The following Azaleas were bred with the hope of getting hardier evergreen types. While we do not know how hardy they really are, we are offering them for your own testing.

FELDYK AZALEAS

From a famous grower in Holland. Introduced as "the Sweet Pea colored strain." They are crosses between *Malvatica* and *Kaempferi* and Japanese Azaleas. Have large bright colored flowers. Force easily, strong growers and very hardy. The blossoms exhibit all the delightful colors we most associate with Sweet Peas. One of the hardest evergreen types we grow.

VUYKIANA AZALEAS

A new race of large flowered Japanese Azaleas, produced by crossing hardy Azalea *Malvatica* hybrids with Azalea *Mollis*. Sturdy growers, prolific bloomers. From the information we have they are much hardier than the Kurume Azaleas. Flowers range from 2 to 2½ inches. All bloom late mid-season. Plants grow tall.

KAEMPFERI HYBRID AZALEAS

In these new *Kaempferi* Hybrids—the result of crossing *Kaempferi* and *Malvatica*—there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers so far achieved. Several years' tests have demonstrated that these new Hybrids are just as hardy as *Kaempferi*, until now the hardiest of the evergreen sorts. In connection with these Hybrids we suggest you try out the New Gable varieties.

SATSUKI HYBRID AZALEAS

We are not sure of the parentage or classification of these Azaleas. Mostly Japanese names and it is easy to misspell them by sound. Will appreciate it if you can help us make the corrections. Many of these varieties we only have a few of, some we have in hundred lots or more. We are still trying to get descriptions of the varieties we are not describing and hope to have it in a future issue. Besides the ones we are offering we have many others in small quantities we are still testing for hardiness and desirability.

A new group from the Chugai Nursery Co. near Osaka, Japan. These are late flowering. Flowers are usually variegated, white or pink ground with red, lilac or purple stripes, white base with colored margin, or purple with white variegation and edge. These need more and wider trial before we can recommend planting in exposed or colder sections.

Many of the variegated sorts will vary in color on the same plant. This is especially true on the Satsuki and Back Acre varieties.

The following descriptions were furnished us by The Chugai Nursery Company.

BACK ACRE AZALEAS

By Morrison

These azaleas are the first of the seedlings grown on personally, with a breeding program that is an extension of one phase of the original Glenn Dale work. They are not Glenn Dales, but are more closely related to the Satsuki group from Japan.

The breeding program centered and still centers on the production of double flowers that will be hardy for outside work, and in as wide a range of kinds that have white or nearly white centers and colored margins. The doubles are represented in this offering but only a few of those to come. The white or light centered kinds are a mere sample of the range to be available shortly.

These kinds are from parents that are perfectly cold hardy in Washington, D.C. and plants have been tested safely in that area, in Memphis, Tenn., and in the general Atlanta area. In extremely cold winters there was some loss of flower buds.

The usual variation in degree of doubling may be expected on newly set plants, and the variations in light centers will vary considerably until the plants are old enough to have many, small, blooming shoots.

A FASCINATING HOBBY

Growing Azaleas is a hobby which provides an ever increasing source of interest. There are so many species to be had and so many almost breath-taking new hybrids being produced, that one is amazed at the magnificent display that we may have with only a small space of ground and a few of the newer plants that are now being offered. If you want a stimulating (and profitable) hobby that grows more interesting, beautiful and valuable every year, then grow azaleas.

Azaleas will grow in full sun or in shade. In the sun you will have brighter colors and growth will be shorter. We prefer a little shade if convenient. The small pot-grown plants should be planted about ten or twelve inches apart in a prepared bed consisting of about equal parts of good acid soil and peat moss or rotten leaf-mold, with about one-half shade.

Azaleas like acid soil with plenty of peat moss or leaf-mold in it. As a fertilizer rotten cow manure, cotton-seed meal and tankage are good. Use this in early spring and keep well mulched with peat moss or leaf-mold and keep the plants well watered during dry weather.

For scale and red spider use Malathion.

If your soil is not acid enough we suggest you use Aluminum Sulphate or Sulphur.

GLENN DALE AZALEAS

We began growing these Glenn Dale Azaleas in 1941. During the past few years, since they are becoming better known, the demand has increased rapidly. Most all the reports we get from the growers are very enthusiastic. They are doing well in some sections where the evergreen varieties were not supposed to grow.

Many who have seen our fields of these Glenn Dale Azaleas in bloom expressed their amazement and joy at their size, coloring and quantity of bloom. You folks who have been dealing with us for the past many years know we do not recommend a plant unless we really believe in it. We do suggest you try some of these Glenn Dale varieties if you can grow any of the other evergreen azaleas and while you may have some disappointments we feel sure you will be greatly pleased with their growth and beauty.

These one-like descriptions do not tell you much but we do have a special booklet that describes them much more fully. Sent on request—no charge.

Sometimes when Azalea flowers are described as striped or flaked on white they will appear as a solid color. When this occurs the branch should be cut out. This seems inherent with the variety—not any fault of the nurseryman.

Capital Letters after variety name indicate sizes available in that variety as capital B means 2 in. pot plant size, capital C means 2 yr. field beds XX trans., and so-on. We hope you will understand this system of indicating sizes as it saves a lot of space in catalog. We have been using this system for Crabapples several years and it seems to be working fine.

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate.

During the summer months we are pleased for visitors to see our nurseries but during the digging season from September to July we cannot give callers the attention we would like. During the main digging season, if a customer takes the time of a foreman, it can mean that in his absence several helpers are idle and orders promised for the next few days cannot be handled. Therefore, we urge you to send your orders in to us several days in advance so we may have them ready for you.

THE RARE FRANKLINIA

Each twig develops at its tip a cluster of buds of graduated size, like overgrown greenish pearls. Early in August the largest of these attain the size of marbles. Then the guard petal folds back, still retaining its firm spherical form. From this shelter emerges four other petals, satiny, snowy white, elaborately frilled and pleated. The snowy, frilly chalice, three inches in diameter, holds a sumptuous mass of orange-gold stamens and breathes forth a delicate, balmy fragrance.

Each flower lasts two or three days and then drops cleanly. There is a constant succession of blooms till hard frost. We frequently get the unusual effect of a tree clad in crimson, autumn foliage and abundantly starred with white flowers.

The Franklinia begins blooming when not more than 3 or 4 feet high. Young trees under favorable conditions increase in height a foot or more each season. Specimens 30 feet high are known. It develops naturally with several trunks, but may easily be trained to a single trunk by removing the sprouts which start from the base.

Franklinia prefers full sun, has proved entirely hardy about New York and hardy in favorable locations about Boston, Mass., and in Ohio.

We have found the Franklinia does much better if it has plenty of moisture at planting time. See color picture second cover page.

HOLLY (Ilex)

For many years we have been urging nurserymen to grow more holly. Fifteen years ago there was not very much demand for holly. If you will refer to our catalogs about that time and since, you will find we said, "The nurseryman who will grow a collection of Hollies to a specimen size will have something he can sell, whether times are good or whether they are bad. There is always a demand for them, and there will be as long as any other plants will sell."

MALUS — FLOWERING CRABS

The Flowering Crabs are among the most charming of spring trees. They are not only beautiful when in blossom but many carry most ornamental and richly-colored fruit in the autumn. Most of the Crab family form graceful garden trees of medium size. They are quite hardy and require no particular cultivation, thriving best in a good loam and full sunshine.

We have larger trees of most of these varieties. Prices on receipt of your want list.

If a variety is listed at 10 rate and not each rate there will be an additional charge of 15 cents per plant if less than 5 are ordered.

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate.

TAXUS (Yew)

The Taxus are undoubtedly the most popular and useful of all the ornamental evergreens. We have been growing them extensively a good many years and the demand keeps increasing.

We honestly believe you will do well to plant and grow on some of these Yews.

	Each	10	100	1000
Baccata repandens (Spreading English Yew). A low form with wide spreading branches and dull bluish green, narrower and longer leaves, partly falcately curved upward. Hardy in New England and one of the best spreading types. Nobody seems to have enough of these the past few years.				
* 2¼ in. pot plants 2 yr.		\$3.50	\$30.00

MORE HATFIELD YEW

The following varieties were grown from stock purchased from the late T. D. Hatfield. He selected these as being the best of his unnamed varieties and we are still carrying them under his original numbers. We are giving brief descriptions.

	Each	10	100	1000
Hatfield No. 6. Somewhat like No. 8 in growth but twigs are not as heavy; leaves narrow. Very graceful.				
8 to 10 in. trans.	\$3.50	\$30.00		
Hatfield No. 7. Bright glossy green, heavy foliage; long needles. A low growing spreading type. Berry bearing. This one sells itself when seen.				
12 to 15 in. trans.	\$4.50	\$40.00		
24 to 30 in. B&B	\$5.00	45.00		
30 to 36 in. B&B	6.00	55.00		
Hatfield No. 8. Slow growing; very compact. Foliage bright green. Resembling <i>Cuspidata Nana</i> . Heavy fruiting type.				
24 to 30 in. B&B	\$5.00	\$45.00		
Hatfield No. 18. Similar in growth to <i>Taxus cuspidata</i> . Foliage a shade lighter making it wonderfully attractive. Probably the most rapid grower of all the low types of <i>Taxus</i> . However, it can be kept compact with a little shearing. If you want a good, quick grower, yet one having the good qualities of <i>Cuspidata</i> .

TINGLE'S YEW SELECTIONS

The following four varieties of yews are our own selections and we believe you will find they are very good.

	Each	10	100	1000
Media T 33. Slender, upright grower. Foliage dark green. Useful in narrow spaces. One of our selection.				
* 4 to 6 in. trans.	\$2.50	\$20.00		
* 6 to 8 in. trans.	3.00	20.00		
* 8 to 10 in. trans.	3.50	25.00		
Media T 34. Full-bodied upright grower; foliage little darker than T 33. Capitata form comes good from cuttings.				
* 6 to 8 in. trans.	\$3.00	\$20.00		
* 8 to 10 in. trans.	3.50	25.00		
Media T 35. This is very much like <i>Cuspidata Nana</i> . Foliage not quite as heavy and grows much better. We think it is a much better plant.				
15 to 18 in. B&B	\$3.50	\$30.00		
24 to 30 in. B&B	5.00	45.00		
Media T 36. <i>Nana</i> type foliage. Light green, graceful.				
* 8 to 10 in. trans.	\$3.50	\$30.00		
12 to 15 in. B&B	\$4.50	40.00		

CEPHALOTAXUS (Plum Yew)

CEPHALOTAXUS PEDUNCULATA FASTIGIATA (*Harrington Plum-Yew*). This plant grows almost exactly like a fine type of the Irish Yew, forming a tall, narrow, compact dark green column with thick, narrow leaves 2 inches long. Very nice.

HORTICULTURAL BOOKS AVAILABLE THROUGH US, POSTPAID

Plant Propagation Practices

A new book on propagation by James S. Wells. It is about the most practical one of its kind that we have ever seen. If you propagate plants and want to order this book we will let you return it if you do not think it worth the price of \$7.95 and we will return your remittance. Contains 344 pages, and many illustrations.

The Arnold Arboretum Garden Book

A new book by Donald Wyman, 354 pages and priced at \$6.50. Just one plant or tree will pay for it and we will guarantee you will want to keep it. If you don't think it worth this send the book back to us and we will refund your \$6.50. We have found several single items in it worth more to us than the cost of the entire book.

THE AZALEA BOOK by Frederic P. Lee and many other distinguished Azalea growers. This book tells more about Azaleas than any other source we know of and it is told in an understandable language so the amateur as well as the professional can easily understand it. If you want to order it and for any reason you are not satisfied we will refund the \$12.00 you paid us for it. Price \$12.00 postpaid. 435 big pages. New edition

A New Book

RHODODENDRONS OF THE WORLD

And How to Grow Them

by David G. Leach

Comprehensive volume (azaleas not included) presents information on landscape uses, cultivation, propagation, pest control, hardiness, greenhouse care and breeding. Full data on species and varieties, including origin, classification, rating, height, color and season of bloom. 544 pages and large ones too.

\$25.00, postpaid

Seems like a lot of money for a book but it must have taken almost a fortune in time and money to gather all the information it contains. If you do not know much about Rhododendrons it will tell you about all you need to know. If you are an expert on them it will tell you more.

THE RARE FRANKLINIA

Here is a plant that just keeps growing in popularity. To see the bloom and fall foliage makes one want it in his own garden. This is one of our very best sellers. Good for bloom and foliage effect. See page 13.

SYRINGA MICROPHYLLA SUPERBA

A new variety of *Syringa microphylla* named *superba*, is said to flower again in early Fall, but primarily it is Spring-flowering. The flowers have the same fragrance as the *Daphne*, which gives it the popular name *Daphne Lilac*.

Syringa microphylla, itself, is distinctive for its very small leaves, less than an inch in length, and quite orbicular. The species is called Littleleaf Lilac. This is a small shrub, 4 to 5 feet in height. The plant is graceful, with slender stems. The flowers are in loose trusses, with main ones at the top of stems, and smaller ones along the branches. The entire plant in flower is like a huge bouquet, pleasing and novel. They bloom a little later than the popular hybrids, at the end of May, or in June, and are highly rated by the authorities. Red in the bud, they open soft pink, and bloom freely. This is a new hybrid, and not yet found in many nurseries. See page 30.

SYRINGA VELUTINA KOMAR Miss Kim

Syringa velutina Komar 'Miss Kim'—A seedling selection made by University of New Hampshire, from seed collected at peak of Paik Un Dae, Pouk Han Mountains, north of Seoul, Korea in 1947. The original plant of 'Miss Kim' has maintained a height not exceeding 4½ ft. in New Hampshire. Flowering late, it escapes frost damage. Flowers lavender, fragrant. Fall foliage burgundy-red. Hardy to at least -25° F.

SYRINGA PALIBINIANA

This dwarf lilac from Korea must surely rank as one of the finest deciduous rock garden shrubs to come to us from the Far East.

Syringa palibiniana has much to commend it. Given a light, leafy soil with good drainage and a sunny position it will thrive and take many years to reach an ultimate height of about 3 ft. The sweetly-scented, pale mauve sprays are produced abundantly in late spring, and it makes an ideal shrub for pot cultivation in the alpine house.

In spite of such virtues, *S. palibiniana* is still a comparative rarity in gardens. See page 31.

SYRINGA JAMES MACFARLANE (NEW)

Introduced by the University of New Hampshire, it is a hybrid of *Syringa reflexa* and *S. villosa*, blooming from 10 days to 2 weeks later than *Syringa vulgaris* types. James MacFarlane is a true pink in the Lilac family and grows to a height of about 8 ft. Its large trusses and rich color make it spectacular and even small plants bloom freely. It is extremely hardy and adaptable, withstanding moisture conditions fatal to vulgaris hybrids. See page 30.

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate.

Many items in this catalog will undoubtedly be sold out before the season is over. We suggest you place your order as early as possible.

EDCO IRON

For experimental use in the control of chlorosis (lack of chlorophyll) in azaleas, gardenias, roses, citrus crops, etc.

Results to date have shown Edco Iron to be very effective in correcting chlorosis in the above crops. Chlorosis may be caused by the excess or deficiency of several major or minor nutrient elements in the plant besides iron, and it may be caused by an excess of water or its lack, but Edco Iron commonly seems to help correct the effect if not the cause of these several conditions.

Full directions for using with each lot.

Prices: 1 lb. \$2.30: 10 or more lbs. at \$2.00 per lb

AUNT MARY'S SWEET CORN

The Sweet Corn Supreme

This is the most wonderful Sweet Corn we have ever grown. One grower describes it as "the best Sweet Corn in the world."

Has the most delicious flavor and keeps a long time before becoming too hard to use. In fact, usually requires artificial heat to cure it for seed purposes.

Aunt Mary's Corn, by its excellent quality, sweetness, and flavor makes a stronger appeal to the Corn-loving public than most any other variety and that appeal continues long after you are tired of other Sweet Corns.

Liberal size packets, 35c each; 3 for \$1.00, postpaid.

\$2.00 per pound, postpaid.

If after growing this wonderful Sweet Corn you are not entirely satisfied, we will refund every cent you paid us for it.

This nursery was started just 62 years ago by the present owner. We have made many mistakes but we believe our customers will agree that we have always tried to give a dollar in value for every dollar received. This will be our aim as long as The Tingle Nursery Co. stays in business. If you have any reason for complaint, tell us.
